

Partnering For More Habitat

Upcoming Quail Management Workshop

Quail Forever will be hosting a Bobwhite Quail and Small Game Management workshop with lunch provided in Milan on September 11th at noon at the Milan Community Center, and in Trenton at the Barton Farm Campus on September 10th at noon. Topics covered will include basic Bobwhite Quail management techniques, Conservation Reserve Program Mid-Contract Management procedure, odd-area development for small game on farms, and conducting fall whistle counts on your property.

The Continuous Conservation Reserve Program is still available for enrollment. Scott will be discussing available practices for wildlife, and a Department of Conservation Program that provides further incentives for enrollments and enhancements to CRP contracts. Enhancements include edge feathering, interseeding forbs, additional rounds of management, and more.

Lunch is provided to those who RSVP. For more information and to reserve your spot, please contact Scott Engelman with Quail Forever at Sengelman@quailforever.org, or 660-619-1208 by September 8th.
